Spine2Wwise - How to setup

Step 1

Download and Integrate the latest Spine Runtime for Unity here:
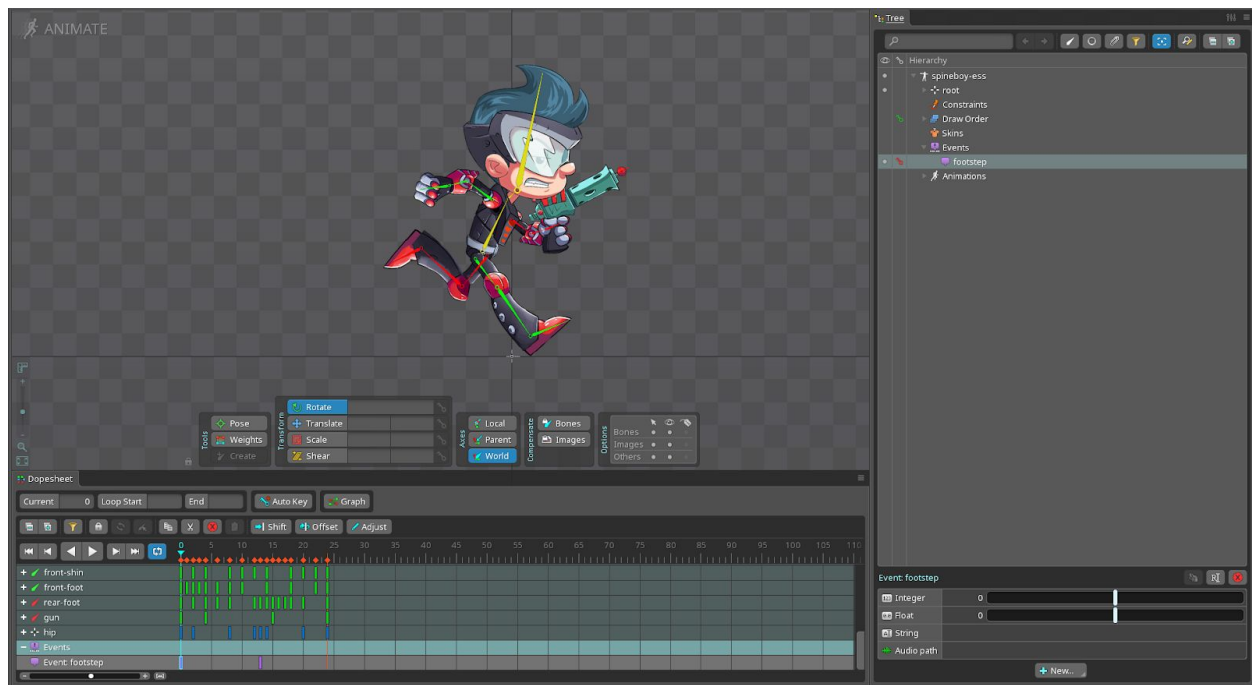

http://esotericsoftware.com/spine-runtimes

Step 2

Download and Integrate the latest Wwise-Unity Integration here:

https://www.audiokinetic.com/library/edge/?source=Unity&id=index.html
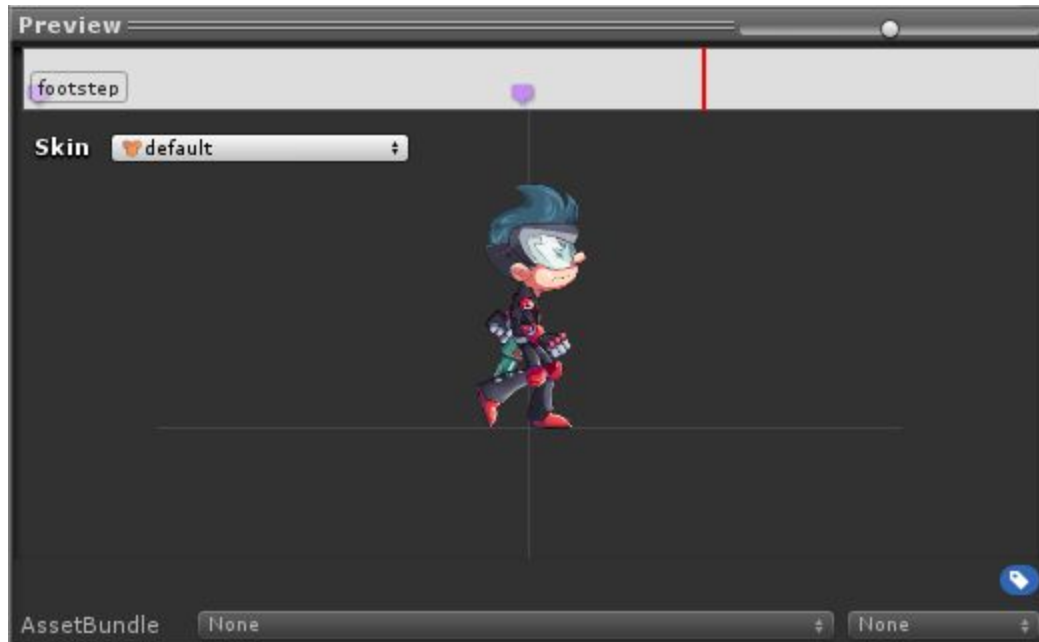

## Step 3

Add events in your Spine project.

Step 4

Make sure to have events in your Spine animation export in unity.

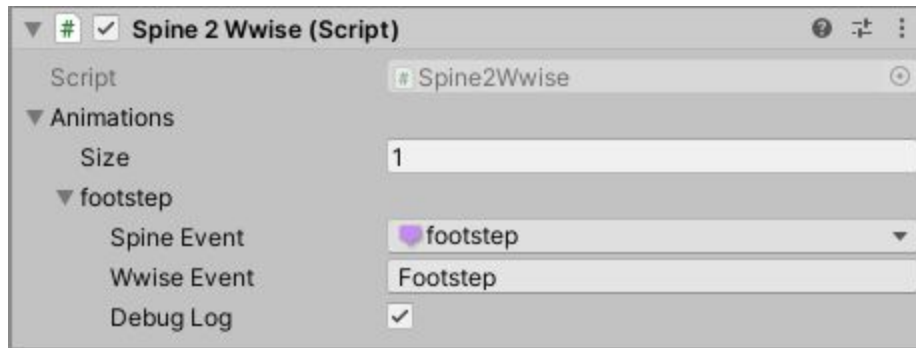

Step 5

Add the Spine2Wwise script as component to your spine game object and use size to choose your animations number.

Step 6

Choose the Spine event and the Wwise event you want to synchronize.

Select debug log to print your event name in the console.
